1	Very interactive class that required a lot of participation inside and outside of class. Communication between teacher and TA could have been better (TA would come to class and have different idea of where we were in the class, doesn't material as well as teacher, needed to look at notes frequently, although did great job of teaching what she knew), Wish there were more opportunities to improve grade, lots of difficult quizzes and assignments that had lots of difficult challenges. Was glad to learn how to work in excel and be active in a class (learning outside class through video lectures and practicing in class/reviewing).
2	Strengths: Ample opportunities for extra credit, practice exam, TA's were fun and easy to reach Weaknesses: Questions for modules were difficult so I would suggest making a 70% or higher equal full credit for lectures, this class required more work than any other class so I'd allow more time to learn and understand the lectures for the last 2 exams
3	Professor Bubb was one of my favorite professors I have ever had! He was engaging, kind, caring, confident, and taught his class in this manor. He memorized every student's name. He held his students to a high standard and challenging them, but also was so willing to help explain things.
4	I literally failed my stats class in high school, so this class made it seem so much easier. I was nervous starting the class, but honestly it wasn't that hard, you just need to go to class. One of the best courses I have taken here in terms of the professor and the teaching style.
5	I felt that this course could also be helpful to have more review worksheets while also having the answers to the practice exam
6	Dr. Bubb was a great instructor. He provided a ton of help and encouragement throughout the semester.

1	I enjoyed Dr. Bubb. He was willing to help and meet with me after test's to go over it. I am very impressed with how hard he works to teach his students and help us learn.
2	I love Dr. Bubb. He is a great professor that really cares for his students. He also makes stats really easy for people who hate math. My only complaint is that he doesn't let you make up any work, even for excused absences. I had to miss class days for university-approved absences and I was not allowed to make up the work I missed, so It really hurt my grade.
3	Excellent teacher & TA's! Dr. Bubb's way of teaching this course has worked really well for me this entire semester. He was always willing to explain the material further if we did not understand, allowed us to ask questions, and called on us specifically each day in class to make sure we could answer his questions. I couldn't recommend that he change anything about the course except maybe offer more extra credit :)
4	Dr. Bubb is great. He will make sure that you know and understand the material presented the best to your ability
5	Dr. Bubb is a really great teacher and he has been one of my favorite teachers while at Auburn. His class is difficult and I did struggle at the beginning of the semester, but I continued to work hard and take advantage of his office hours and now I have an A in the course. I also like how his class is set up with having lecture days on Tuesday/Thursday and practice days on Monday/Wednesday. He does require a lot of homework throughout the week and I know that I spent a lot of my time working on it, but I know that there is a lot of information for us to get through. Overall, I am very happy with how this class turned out this semester.
6	Bubb does his classroom backwards. He tells us that students learn better this way by watching lectures on a video online. Any struggles i have had in this class are due to this. I do not understand the lectures just by watching and listening. I learn by doing, which is in class. We only do worksheets and excel spreadsheets. I have caught myself teaching myself and then the exams are primarily based on our excel skills, not the actual information he talks about in the online lecture.

1	Rob improved this class from last semester. I appreciated that we spent most of the semester using SPSS instead of SAS and also thought that applying our learning by reading published articles was a helpful exercise. I felt encouraged when carrying out procedures on SPSS began to feel like second nature. There are still several ways I think the class could be improved. First, the amount of work required for this class was consistently overwhelming and gave me a lot of anxiety. Compared to other classes, stats consistently took up much more time and energy during my week. The articles we used for the reading worksheets were very difficult to understand and I learned very little from them. Additionally, I am still fuzzy about many of the core concepts about this class and think it would be helpful if Rob would slow down and make sure we're understanding what's going on. Lastly, we had to rent a textbook for the first couple weeks of class which was a lot of money for something we only used twice.
2	I loved it when Rob got back to me with feedback when I managed to turn in assignments early. Sometimes the feedback was inconsistent on paper rewrites.
3	An area of improvement would be consistency in grading. Rob told us there is always room for us to improve, and I do not disagree, but regarding grading I would get points off for not being concise and then the next week he would tell me to write more so there was no way to get the point either way. Overall, it was nice to be exposed to some new statistical packages!
