1	The instruction for this course was amazing. Dr. Bubb was very personable and kind. I've heard from many people that this course can be challenging because of the material and work load, but that the professor was so encouraging and helpful. So now after taking this class, that is the exact same takeaway that I have. The work load was very tough, but not impossible. Of course it was a mini semester so it required heavier work because of the short amount of time. Strengths would include that there was never a moment where I felt lost or helpless because of the feedback, office hours, and detailed lectures. Dr. Bubb was always willing to answer any questions and so kindly would take the time to highlight exactly what I need to work on for next test. This class was run so well and made it enjoyable. The only improvement I can think of is possibly having a practice exam key and a key for the assignments so that I could check my work afterwards to see if I was on the right track or not. Thank you Dr. Bubb for all of your help! I have so enjoyed this class!
2	Dr. Bubb was great, but the time crunch on this class was terrible. It was not his fault that there were so many assignments, lectures, tests, etc. because it is meant to be a 4 hour class over 15 weeks. I think this course should NOT be offered online for the mini semester. It is too much material to try an cover in such a short time. There were some weeks that I would take 2 tests in one week. This is not a good environment to learn in and I would recommend no longer offering the course like this.
3	Dr. Bubb was very clear about the expectations and workload and was extremely helpful with this class, especially during the summer. I think study sessions online would be helpful before each test though, and less work due plus in the range of time it was due, it was a lot.
4	Dr. Bubb is an extremely helpful and encouraging professor. He went through everyone's exams and gave them specific feedback in time for the next exam. Though the material came quickly and we had very little time between each exam, I understand that is the nature of mini semesters and Dr. Bubb very obviously put in as much work during these past 5 weeks as the students did. The material was challenging but explained well with plenty of opportunities for practice and extra credit which was very much appreciated.
5	Does not thoroughly explain everything, gets very confusing. Also his videos and microphone on the websites does not always work. It constantly goes out or shows black screen. I changed my laptop to see if it was my computer however it was not.
