1	Walking into Statistics at the beginning of the semester, I was for sure convinced it would be really complex for me to understand and I would struggle with it, however, Dr. Bubb made sure to explain everything and review before every test as well as have office hours every day! As a student, it is great to know that the professor was available and helpful whenever possible! This was my favorite class this semester!
2	This man is not a real human being. He is an angel. I CANNOT SAY ENOUGH. He sent us a picture of his baby girl the day after she was born along with an email telling us how to prepare for class..... and he was THERE! Talk about a dude that doesn't believe in neglecting his students. I applaud Rob for giving 100% as a husband, dad, student, and teacher. He is thorough, brilliant, and never misses a beat. He is an inspiration and easily the best professor I've had at Auburn (not to say I haven't had many phenomal ones prior to him) and I'm graduating. Auburn needs not let him go.. EVER.
3	Professor Bubb is without a doubt one of the best professors I have ever had at Auburn. He really wants all of his students to do well in class and provides many opportunities and extra credit options to do so. I was really scared about this class and really thought I was going to end up with a C or a D, but because Professor Bubb is such a great teacher and really explains the material well, I am really excited I may end his class with a B! I would definitely recommend him for anyone looking to take statistics in the future and I wish he taught other courses just so I could take him again. He was also always in a great mood every morning and made us all excited to learn from him.
4	One of the best teachers I've ever had!! Great job!
5	One of the best teachers I've ever had. The course material is difficult for me but he makes learning it very possible. He is also one of the most invested and kind professors I've ever had!
6	Needs to slow down a little when teaching, but he's still a good teacher.
7	Loved Mr. Bubb. He was excellent at explaining difficult topics and breaking them down into easy to understand ideas. I went into this class thinking it would be one of the hardest classes I'd take at Auburn and was extremely surprised that it turned out to be one of my favorites. Mr. Bubb has an excellent way of communicating with students and I really like that he remembers your name and does everything he can to help you.
8	I thought the online lectures were pointless, I missed multiple or had to just rush through the questions to get the partial credit, but I still got an A in the class. Also, during class you would go over the lecture anyways so I don't know why we had to do them on our own time and in class.
9	I loved this class so much and I wasn't expecting to. Ive always been pretty good at math but this class made me actually like it. Everything was explained in such a good way that it made sure to never get overwhelming or too much information. Professor Bubb was very approachable and he made sure to make sure people understood the materials and made the subject very enjoyable. Class was actually fun to go to.
10	Dr. Bubb made an ordinary statistics class into a class I actually looked forward to waking up for because of the professionalism and enthusiasm he showed when presenting the material and also made a strife into getting to know everyone and actually caring for his students.
11	Dr. Bubb is the greatest!

1	The class was harder than I expected and because this is not my major and just a required core course it seemed too in depth for a intro class.
2	Statistics can be a really hard course but Dr. Bubb is a wonderful teacher and was able to put statisitcs in a way that everyone could understand and made statisitcs way more approachable. His teaching methods are awesome.
3	Robert Bubb is a fantastic professor and gives student every opportunity to succeed in class. He is very friendly and approachable outside of class and will help you to the best of his abilities. He is one of the best professors I have had at Auburn.
4	Mr. Bubb is a great teacher. This class was not easy for me but I enjoyed coming to class due to the atmosphere.
5	Loved this class! Rob made this class interesting and fun. Super approachable and always willing to answer questions.
6	I was so nervous going into this class and was dreading having one class four days a week but he was an amazing teacher who was so helpful, nice, and understanding. He made the stress of the class not to bad and not so scary. I would highly recommend him as a teacher in the subject.
7	I was dreading statistics, but Rob made it as painless as possible. He was kind and took the time to get to know each of us personally. I like that he had a list of people to call on. It made the process of calling on people a lot better. The actual teaching was as straightforward as possible. There was plenty of help available to make sure that we were able to succeed. The practice tests were so incredibly helpful so I knew how to cope with the real test. And having the lectures online and doing the examples in class was a lot easier. It was much easier than I expected and having an understanding of research was much more useful than I thought. I would actually encourage others students to take the class.
8	He did a very good job at explaining the material and being there to answer questions if we needed it. You can really tell that he wants his students to learn. Not a lot of professors care if you learn or not, they just want you to do the work so that was refreshing. He also incorporated what was going on in the world into class to make us think about the world around us.
9	Fantastic class! Best class I've ever taken, but could use more worksheets for the last module
10	Dr. Bubb is by far one of Auburn's best teachers. He is so reasonable and he definitely puts his students first unlike so many teachers. He totally wants his students to succeed and allows them all to do so. I wish I could take another course that he teaches.

Q9 - Additional comments – Strengths and areas for improvement.

   Faculty: Pittman, Joe F

Response Rate: 100.00%   (9 of 9)

1 This course was tough. Robb is always very approachable and helpful. I really don't know how it could improve unless students could somehow magically have more time to dedicate to it. It may even be helpful to have biweekly quizzes that aren't weighted much, just so students practice recalling information without notes. I didn't realize that it would have been helpful until the final. I typically do my assignments with my notes and lecture slides open beside me, so while I have learned a lot, I usually have the option of looking up definitions and double checking my understanding. Just a thought!

2 This class was done very well. Robb is always available and answers your questions promptly. He is always willing to meet with you and review your materials. This class would not be the same without Robb. The ability to review your assignments is very helpful to fully understand the material.

3 The lecturer Rob Bubb was fantastic! He did a great job of explaining complicated concepts and made us feel at ease. The profession of assignments through the semester felt right - I felt prepared by Rob to attempt each new thing.

4 Rob made stats understandable. He was always available and very willing to take time out of class to explain any concepts I didn't understand or answer any questions I had. DON'T EVER LET HIM LEAVE!

5 Rob is a dynamic, effective, and truly compassionate instructor! I'm forever grateful that I am taking my research methods sequence under his instruction, particularly because of his enthusiasm for the subject and for his genuine care for his students.

6 Responses are for lecturer Rob Bubb.

7 OK I only put disagree to being available and approachable because while it seemed like Rob had the best intentions to be helpful outside of class, that didn't always seem to be reality. My main critique of the class is just wanting him to have more time. An unfair critique I know. But it is clear he really wants his students to learn the material, so I know it has to come down to time.

8 Dr. Bubb is an amazingly dedicated and passionate teacher. In all my years of being a student I have yet to meet a teacher with more drive and determination. This was my first reserach methods course and I simply could not have had a better teacher and mentor. Dr. Bubb was always accessible despite a very hectic semseter. He encouraged me to learn and grow more as a student. I learned so much about stastical analysis and it was so great to see my hard work pay off in my new ability to genaralize what was learned in this class and apply to other class that I was taking this semester. Though I learned so much about stats from Dr. Bubb, he also taught us something even more valuable. Dr. Bubb modeled for us what it takes to work hard, to perserve in life, and to relentlessly persue your dreams. I am so grateful to have had such an amazing teacher that has a laid a wonderful foundation in research methods. I look forward to continuing to learn from Dr. Bubb in the upcoming semesters.

9 Bubb was very approachable and helped boost my confidence in this class. I was glad that I was able to learn so much about research methods and be brave in my endeavors to open my mind to such an abstract concept. I suggest that Bubb keeps at what he is doing with helping students and being available.
